

# Tunka-Rex Virtual Observatory

V. Lenok\*, D. Kostunin, O. Kopylova, P. Bezyazeev, D. Wochele,  
F. Polgart, S. Golovachev, V. Sotnikov, E. Sotnikova  
for the Tunka-Rex Collaboration

*What is this contribution about?*

We present Tunka-Rex Virtual Observatory, a software framework and database for the storing and processing data from cosmic-ray radio detectors

*Why is it relevant / interesting?*

Huge amount of data acquired by radio detectors aimed at air-shower detection are left unused

*What have we done?*

We developed software framework for the the storing and processing data from cosmic-ray radio detectors and published Tunka-Rex data there

*What is the result?*

The software is published under free license, data is fully accesible via JupyterHub at IAP KIT
